Safety Data Sheet
Rodenthor Block Bait
Emergency Phone 1-800-424-9300 (Chemtrec)

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: Rodenthor Block Bait
Chemical Name: Bromadiolone
Recommended use of the chemical and restrictions on use: Rodenticide for the control of rats and mice

Company: Ensystex II, Inc.
Address: 2175 Village Dr., Fayetteville, NC 28304
Daytime Phone: 1-800-398-3772

2. HAZARDS IDENTIFICATION

Hazard classification
This material is not considered hazardous under the criteria of the Federal OSHA Hazard Communication Standard 29CFR 1910.1200

Label Elements

4. FIRST-AID

Description of first-aid measures
General advice: First-Aid responders should pay attention to self-protection and use the recommended protective clothing (chemical resistant gloves, splash protection). If potential for exposure exists, refer to Section 8 for specific personal protective equipment.

Inhalation: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. If the person is not breathing and has no pulse, consider cardiopulmonary resuscitation (CPR); use pocket resuscitation mask, bag valve mask etc., to avoid risk of poisoning rescuer. Consult a physician in all cases.

Eye Contact: Hold eye open and rinse slowly and gently with water for at least 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor immediately for treatment advice.

Skin Contact: Take off Contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor immediately for treatment advice.

Ingestion: Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the Poison Control Center. Never give anything by mouth to an unconscious person.

Bromadiolone is an anticoagulant, which may produce bleeding. Symptoms may be delayed for several days after exposure. In case of poisoning bleeding disorders and increased bleeding tendency may occur. In severe poisoning a strong internal bleeding can cause circulatory collapse and consequent death. Reduced activity of prothrombin is indicated to use antidote vitamin K1 (phytomenadione) at a dose of 10 mg IV or as an infusion. Further treatment: Vitamin K1 (phytomenadione) is administered to 6x daily at a dose of 10 mg IV depending on the clinical picture, and in most serious poisonings to 125mg / day. Vitamin K3 (menadione) is not effective! Because of the risk of hematoma avoid intramuscular injections. In the case of severe bleeding blood transfusions and further substitution of coagulation factors in the form of fresh frozen plasma or prothrombin complex concentrate is also needed.

5. FIRE-FIGHTING MEASURES

Extinguishing Media: Alcohol or polymer foam. Carbon dioxide (CO2) Advice for firefighters
Unsuitable extinguishing media: Full water jet.
Explosion Data
Sensitivity to Mechanical Impact: Not sensitive.
Sensitivity to Static Discharge: Not sensitive

Hazardous combustion products:
In the event of fire the following is released: poisonous and irritating gases.

Protective actions:
In case of fire do not breathe fumes/gases. Cool containers at risk with water spray jet. If possible remove containers from endangered area. Contaminated firefighting water must be disposed of in accordance with the regulations; do not allow it to reach the sewage system.

Special protective equipment for firefighters: Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Isolate and post spill area. Wear appropriate safety clothing, respiratory protection devices and eye/face protection (see Section 8). Evacuate unprotected personnel that are nearby.

Rodenthor Block Bait
Environmental precautions: Keep people and animals away from and upwind of spill or leak. Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

Methods and materials for containment and cleanup: Small spills: Take up mechanically and collect in suitable container and dispose according to current regulations. Large spills: Contact Ensystex Inc. for cleanup assistance. See Section 13, Disposal considerations, for additional information.

7. HANDLING AND STORAGE
Handling: Use good personal hygiene. Do not contaminate other pesticides, fertilizers, water, food or feed by storage or disposal.
Storage: Keep out of reach of children. Product should be stored in compliance with local regulations. Store in a well ventilated, cool, dry area. Keep away from heat sources. Store in original container.
Incompatible products: None known

8. EXPOSURE CONTROLS/PERSONAL PROTECTION
These recommendations are for Manufacturing. Applicators should see the product label for proper personal protective equipment.
Engineering measures: Apply technical measures to comply with the occupational exposure limits.
Exposure controls
Provide general and/or local exhaust ventilation to control airborne levels below the exposure limits.
Respiratory Protection: At atmospheric levels should be maintained below the exposure guidelines. When respiratory protection is required or during emergency conditions, use a NIOSH/MSHA approved respiratory protection.
Hand/Skin Protection: Wear long-sleeved shirt, long pants, socks, protective gloves and shoes
Eye/Face Protection: Chemical proof goggles / face shield

9. PHYSICAL AND CHEMICAL PROPERTIES
Appearance/Odor: Red wax block/weak
pH: No information available
Flash Point/Range: No information available
Water solubility: No information available
Vapor pressure: No information available
Specific Gravity: No information available
Bulk Density: No information available
Flammability (solid, gas): No information available
Flammability limit in Air
   Upper flammability limit: No information available
   Lower flammability limit: No information available
Vapor pressure: No information available
Vapor density: No information available
Density: 1.25
Solubility in other solvents: No information available
Partition coefficient: No information available
Autoignition temperature: No information available
Decomposition temperature: No information available
Oxidizing properties: No oxidizing properties.

10. STABILITY AND REACTIVITY
Reactivity: None under normal use conditions
Chemical Stability: Stable under normal storage conditions.
Conditions to Avoid: Avoid high temperatures
Materials to Avoid: Strong oxidizing agents.
Hazardous Decomposition Products: Under normal use conditions no hazardous decomposition products expected. In case of fire/explosion vapors dangerous for health are spread. Carbon oxides are the most likely decomposition products.
Additional Information: Hazardous polymerization not likely occur.

11. TOXICOLOGICAL INFORMATION
For product
Acute Toxicity: Oral LD50/Rat/>2,000mg/kg; Dermal LD50/Rat/>2000mg/kg
For components
Bromadiolone (28772-56-7): Oral LD50/Rat/>0.56 mg/kg; Dermal LD50/Rat/ >1.71 mg/kg
Skin corrosion/irritation
No information available
Serious eye damage/eye irritation
No information available
Sensitization
No information available
Carcinogenicity: No information available
Teratogenic effect: No information available
Carcinogenic effects
No information available
Reproductive toxicity effects
No information available
Mutagenic effects
No information available
Aspiration hazard
No information available

Rodenthor Block Bait
12. ECOTOXICOLOGICAL INFORMATION

Toxicity to Bromadiolone (28772-56-7)
Acute toxicity to fish (steelhead)
LC₅₀, 96 Hour, 2.86 mg/l
Acute toxicity to aquatic crustacea (water flea)
EC₅₀, 48 Hour, 2 mg/l
Acute toxicity to algae/aquatic plants (Scenedesmus suspicatus)
EC₅₀, 96 Hour 0.17 mg/L
Persistence and degradability
No information available
Bioaccumulative potential
Partition coefficient n-octano/water (log Kow) Bromadiolone (28772-56-7) >3
Bioconcentration factor (BCF) No information available
Mobility in soil
No information available
Adsorption/Desorption
No information available

13. DISPOSAL CONSIDERATIONS

Waste disposal methods: Improper disposal of excess pesticide is prohibited. If these wastes cannot be disposed of by use according to the label instructions, contact appropriate authorities for guidance.
Contaminated Packaging: Containers must be disposed of in accordance with local, state and federal regulations. Refer to product label for container disposal instructions.

14. TRANSPORT INFORMATION

DOT This material is not a hazardous material as defined by U.S. Department of Transportation 49 CFR Parts 100 - 185.
UN #:
Proper Shipping Name: Not dangerous according to ADR
Hazard Class:
Packing Group:
Transport in bulk according to Annex II MARPOL73/78 and the IBC Code

15. REGULATORY INFORMATION

The information herein is given in good faith, but no warranty, expressed or implied, is made. Consult Ensystex II for further information.
US Federal Regulations
SARA 313
Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). This product contains a chemical or chemicals which are subject to the reporting requirements of the Act and Title 40 of the Code of Federal Regulations, Part 372:
Not listed
Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Sections 311 and 312
Not listed
FIFRA Information
This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. Following is the hazard information as required on the pesticide label:
Signal Word: Caution
Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Causes moderate eye irritation. Do not get in eyes, on skin, or on clothing. All handlers (including applicators) must wear shoes plus socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

Disclaimer: The information of this SDS is based on the present state of our knowledge. The user’s working conditions however, are beyond our knowledge and control. The product is not to be used for purposes other than those specified under section 1 without a written permission. It remains the responsibility of the user to ensure that the necessary steps are taken to meet the laws and regulations. Handling of the product may only be done by people above 18 years of age, who are satisfactorily informed of how to do the work, the hazardous properties and necessary safety precautions. The information given in this SDS is to describe the product only in terms of health and safety requirements and should not, therefore, be construed as guaranteeing specific properties.
Revised 07/24/2015
