

ZYTHOR GAS FUMIGANT DOES WHAT SPOT TREATMENTS DON'T

FACT: The inspection of your home for drywood termites is only as good as the inspector doing the inspection.

Even with today's technology a termite inspector cannot inspect all areas of your home. If the inspector cannot locate all of the termites how are they going to treat them?

A spot or local treatment only takes care of, hopefully, the termites in that one area. A whole house treatment with **ZYTHOR GAS FUMIGANT** ensures complete elimination of drywood termite infestations.

ZYTHOR GAS FUMIGANT	Spot Treatment
Complete elimination of drywood termites, regardless of location within a structure.	Only the drywood termite colonies that can be found and accessed can be treated.
Utilizes the time-tested, scientifically proven active ingredient Sulfuryl Fluoride.	Chemicals, equipment, and treatment methods vary between operators which can yield inconsistent results.
No drilling or modification to your home is required.	Demolition or drilling may be required to access treatment areas.
No chemical residue left behind.	Chemical residue is left behind.

Make the wise choice

-  100% elimination the first time.
-  No drilling or modification to your home.
-  Zero chemical residue.
