5 oz (with battery)

Dimensions
5.5" x 1.25"

Features
Dual Switch Technology
2-Modes (High & Low)
2-Way Clip
IP67 Waterproof Rated
Aluminum Construction

Designed in direct response to technician feedback from the field, the **THOR Micro Torch+** eliminates multi-click strobe and flashing modes in favor of a clean, reliable, two-mode interface: High and Low. No more cycling through SOS signals while inspecting dark crawlspaces, attics, or wall voids. Just immediate, dependable illumination when you need it.

Complete with onboard USB-C charging and powered by a standard, removable 18650 battery, it gives you the best of both worlds: plug in anywhere to recharge, or pop in a spare for non-stop performance.
